Subject Index to Volume 131

Thermal and fluid design

Two-dimensional analysis of discharge flow of high-pressure saturated water from orifices, A. Minato and S. Murata 131 (1991) 25
Reliability assessment of emergency exhaust system in a pool-type research reactor, S.A. Khan 131 (1991) 37
Examination of thermal detonation codes and included fragmentation models by means of triggered propagation experiments in a tin/water mixture, M. Bürger, K. Müller, M. Buck, S.-H. Cho, A. Schatz, H. Schins, R. Zeyen and H. Hohmann 131 (1991) 61
An investigation for usage of graphite powder-helium suspension as reactor coolant in a HTGR, Z. Altac and N. Yucel 131 (1991) 71
Summary of ROSA-IV LSTF first-phase test program – Integral simulation of PWR small-break LOCAs and transients –, Y. Kukita, Y. Anoda and K. Tasaka 131 (1991) 101
Development of a new bubbly-slug interfacial friction model for RELAP5, J.M. Putney 131 (1991) 223
An unstable, condensation controlled two-phase natural circulation mode, K. Almenas, C.C. Wu, L. Ragulskis and M. diMarzo 131 (1991) 241

Heat conduction and transfer

Evaluation of heat-transfer coefficient at direct-contact condensation of cold water and steam, I. Aya and H. Nariai 131 (1991) 17
Propagation of fuel–coolant interactions in multi-jet experiments with molten tin, G. Fröhlich 131 (1991) 209

Fluid dynamics

Flow-induced vibration and related technologies in nuclear components , M.J. Pettigrew, L.N. Carlucci, C.E. Taylor and N.J. Fisher 131 (1991) 81
Flow measurements in rod bundle subchannels with varying rod–wall proximity, B.H. Ouma and S. Tavoularis 131 (1991) 193
Propagation of fuel–coolant interactions in multi-jet experiments with molten tin, G. Fröhlich 131 (1991) 209

Engineering mechanics

The Nuclear Electric aseismic piping research programme, G.D.T. Carmichael 131 (1991) 113
A UK regulatory view of fracture mechanics, A.G. Miller 131 (1991) 139
Mechanical modeling of creep, swelling and damage under irradiation for polycrystalline metals, S. Murakami, M. Mizuno and T. Okamoto 131 (1991) 147
On the *J*-integral concept for elastic-plastic crack extension, H. Yuan and W. Brocks 131 (1991) 157
An algorithm for seismic analysis of low-rise structural walls, S.D. Jost and Y.L. Mo 131 (1991) 263
An overview of the CSNI-PWG3 Workshop on the complementary roles of fracture mechanics and NDE in safety assessments of components, N.R. McDonald, D.H. Njo and R.W. Nichols 131 (1991) 299

Materials properties

Irradiation behaviour of MOX fuel: Results of an EPMA investigation, C.T. Walker, M. Coquerelle, W. Goll and R. Manzel 131 (1991) 1
Mechanical modeling of creep, swelling and damage under irradiation for polycrystalline metals, S. Murakami, M. Mizuno and T. Okamoto 131 (1991) 147

Mechanical design, component fabrication and testing

The Nuclear Electric aseismic piping research programme, G.D.T. Carmichael 131 (1991) 113
Methodology for the ultrasonic testing of austenitic stainless steel, P. Dombret 131 (1991) 279
Erosion/corrosion data handling for reliable NDE, J. Bridgeman and R. Shankar 131 (1991) 285
An overview of the CSNI-PWG3 Workshop on the complementary roles of fracture

mechanics and NDE in safety assessments of components, N.R. McDonald, D.H. Njo and R.W. Nichols 131 (1991) 299
Swedish approach and experience with inspections of austenitic components in the primary circuit of BWR's, B. Malmberg 131 (1991) 307
Basis/background for ASME Code Section XI proposed Appendix VIII: Ultrasonic examination performance demonstration, C.D. Cowfer 131 (1991) 313
Research and development of ISI techniques in Japan, S. Miyoshi 131 (1991) 319
Plant service continuance approach through periodical examination, K. Yoshida, S. Kataoka and A. Okamoto 131 (1991) 337
Some experiences and development in Japan related to nondestructive examination and fracture mechanics in structural integrity assessment of nuclear power plant components, N. Maeda and G. Yagawa 131 (1991) 329

Reactor concepts and systems analysis

Safety aspects of the 200 MW_{th} Siemens Nuclear District Heating Plant, including accident management measures, A. Göbel 131 (1991) 129

Safeguard engineering

Leakage behavior of inflatable seals subject to severe accident conditions, M.B. Parks 131 (1991) 175

Radiation shielding

Measurement of activity distributions of (D–T) neutrons in concrete, B.S. Seshadri 131 (1991) 187

Isotope engineering

Fissile material detection by active neutron interrogation with radioactive neutron sources, P. Filss 131 (1991) 271

Core physics and fuel design

Irradiation behaviour of MOX fuel: Results of an EPMA investigation, C.T. Walker, M. Coquerelle, W. Goll and R. Manzel 131 (1991) 1

Nuclear safety

Reliability assessment of emergency exhaust system in a pool-type research reactor, S.A. Khan 131 (1991) 37
Summary of ROSA-IV LSTF first-phase test program – Integral simulation of PWR small-break LOCAs and transients –, Y. Kukita, Y. Anoda and K. Tasaka 131 (1991) 101
The Nuclear Electric aseismic piping research programme, G.D.T. Carmichael 131 (1991) 113
Safety aspects of the 200 MW_{th} Siemens Nuclear District Heating Plant, including accident management measures, A. Göbel 131 (1991) 129
A UK regulatory view of fracture mechanics, A.G. Miller 131 (1991) 139
Leakage behavior of inflatable seals subject to severe accident conditions, M.B. Parks 131 (1991) 175
An unstable, condensation controlled two-phase natural circulation mode, K. Almenas, C.C. Wu, L. Ragulskis and M. diMarzo 131 (1991) 241
Overview of containment venting as an accident mitigation strategy in US light water reactors, D.L. Kelly 131 (1991) 253
